

Marta Vidal

Machine Learning Engineer — marta.vidal@example.com — +34 600 777 888

Experience

Machine Learning Engineer, FinPredict (2022-2026)

- Trained and deployed custom fraud-detection models (XGBoost, PyTorch) serving live traffic.
- Built the data pipelines and retraining jobs in Python, running on a scheduled basis.
- Worked with a senior engineer to design the serving architecture for the model API, including caching and versioning; did not own infra decisions end-to-end.

Software Engineer, WebCraft (2020-2022)

- Built and maintained backend services in Python (Flask) for a SaaS product.
- Wrote integration tests and participated in on-call rotation.

Education

BSc in Data Science, Universitat Pompeu Fabra (2016-2020)

Skills

Python, PyTorch, XGBoost, Flask, PostgreSQL, Docker, basic system design
