

Elena Torres

Backend Engineer — elena.torres@example.com — +34 600 444 555

Experience

Backend Engineer, RetailHub (2023-2026)

- Maintained REST APIs in Python (FastAPI) for an e-commerce platform.
- Contributed to a product-recommendation feature using a pre-trained model from a third-party ML library (scikit-learn); did not train models from scratch.
- Helped a senior engineer split a monolith service into two smaller services; did not own the overall architecture decisions.

Junior Developer, LocalSoft (2021-2023)

- Built internal CRUD tools in Python and JavaScript.
- Wrote unit tests and fixed bugs reported by QA.

Education

BSc in Computer Science, Universidad de Sevilla (2017-2021)

Skills

Python, FastAPI, scikit-learn (basic), JavaScript, PostgreSQL, Git
